

Dr Dimitri CORPAKIS, an engineer by training, has to date more than 26 years experience in European affairs. Before joining the European Commission in 1990, he worked as an EU expert with the Greek Ministry of Education. His Brussels career started in 1990 (Education and Training) before moving in 1992 in the area of R&D. After an assignment with the ESPRIT Programme (European Strategic Programme for Research in Information Technologies), he moved to the R&D Policy area, with personal contributions to several initiatives (moving towards e-Science, setting-up the European Research Advisory Board (EURAB), Regions of Knowledge), and contributing to the first Benchmarking exercise (Impact of R&D on Competitiveness and Employment). He is currently (April 2007) the Head of Unit on "Horizontal

aspects and Coordination" at the Directorate "Science, Economy and Society" of the Directorate General for Research, that manages 2 Programmes of the 7th Community RTD Framework Programme (Research on Socio-economic sciences and Humanities and Science in Society).

Throughout his work in the Commission, Dimitri has followed closely the key issues surrounding the deployment of the Internet and its impact on Europe and particularly European Science. In 1999 he had the responsibility of an Expert Group (chair: Professor Ian Butterworth) that produced a report entitled "Transforming European Science through Information and Communication Technologies: challenges and opportunities of the digital age). He has also followed and participated closely in the "e-Europe" initiative of the European Commission.
